How to post Instagram pictures from Mac?(1) Gramblr is a MacBook to Instagram uploader that allows uploading pictures directly from Mac to your Instagram account.. Instagram is an online mobile photo and video sharing service which was launched in October 2010.. However, a big disadvantage of the app is that people who do not use a smartphone can access the pictures but cannot upload directly to the site from their PC or Mac devices.. The software got a simple and easy-to-operate interface so that you can crop and filter the images as you like.. So there are a few working ways to directly upload videos and images to Instagram from your Mac which we are going to guide you with today. 0041d406d9 [Bme A Wonderful.
